User Manual

Homepage

Homepage includes three different options of going to either login, signup, and redirecting to the homepage.

Sign Up Page

Signing up page will bring you to a page that will allow you to input user credentials. There is a check to make sure that the email address that you are attempting to use is not taken.

Post Signup
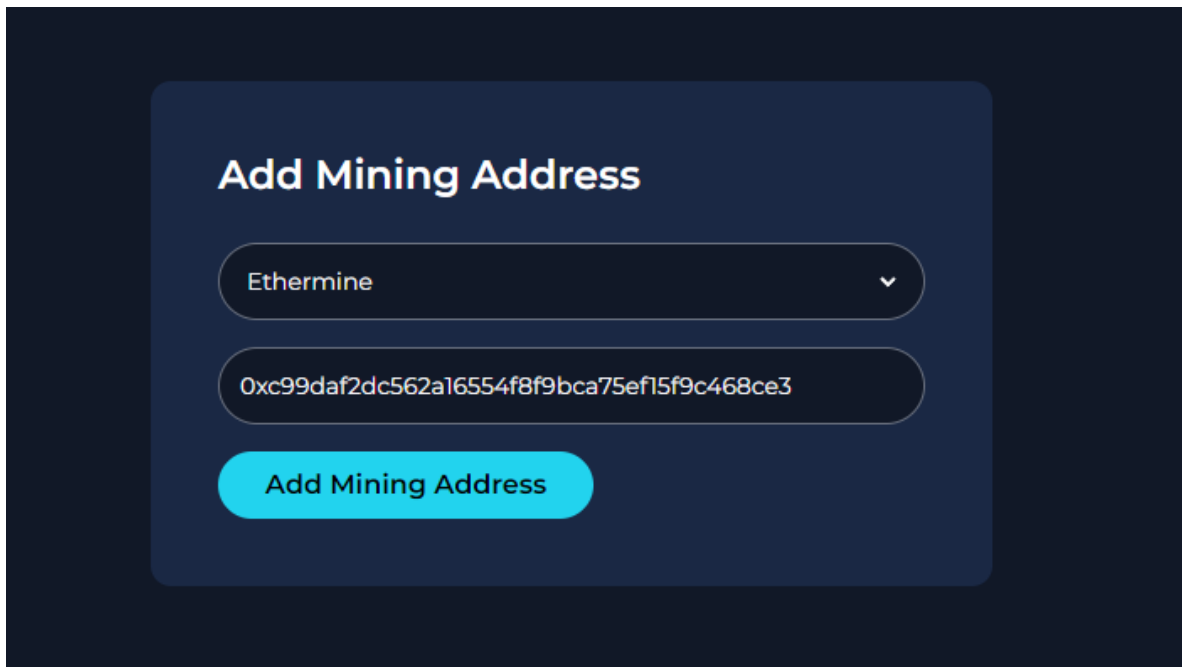

After signing up, users are taken to a Wallet page in which they are prompted to input a wallet (currently only works for ethermine and nanopool) in which they can add a mining pool to their dashboard.

Adding an ethermine address

Dashboard

Upon adding a mining address and navigating to your dashboard, you are given a screen with your added addresses on it with an option to swap between your ethermine and nanopool entries. You are also given a button to minimize and maximize the address as well as delete an address.

Maximized Address

Mining Addresses
